DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I in the reply filed on 5/3/08 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 46 and 47 are rejected under 35 U.S.C. 102(a) as being anticipated by the pre-grant publication to Murray et al. (US 2002/0062956). Murray et al discloses a self lubricating expansion mandrel for expanding a tubular. It includes a housing 18 with a tapered outer surface. This housing has one or more grooves in it that hold a solid lubricant. These grooves extend to the trailing edge of the expansion mandrel. The grooves can take any number of shapes, such as cylindrical, axial, or a combination thereof. Any grooves located on the surface are going to inherently comprise a textured surface. The lubricant in the grooves can be a number of things including a fluoropolymer coating, a soft metal or a film of material.

Allowable Subject Matter

4. Claims 1-45 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or fairly suggest an expansion mandrel with grooves on its outer tapered surface where there is a conduit between the grooves and a grease supply or lubrication supply

chamber located within the housing and there are means for forcing grease or lubrication from the supply chamber to the groove as specifically called for in the claimed combinations of the present invention.
